EDUCATION

Bachelor of Science in Computer Science

Lewis University, Romeoville, IL

December 2024

GPA: 3.66/4.00

SUMMARY OF TECHNICAL QUALIFICATIONS

OPERATING SYSTEMS:

- MacOS, Windows, Linux

PROGRAMMING LANGUAGES:

- Java, Python, JavaScript, SQL

WEB DEVELOPMENT:

- HTML, CSS, JavaScript, Tailwind CSS, ReactJS, Flask, node.js, Microsoft Azure, Docker, MongoDB

DEVELOPMENT MANAGEMENT TOOLS:

- Git, GitHub, Microsoft Office

SOFTWARE DEVELOPMENT METHODOLOGIES:

- Agile Development, Waterfall Development, Scrum, SAAS

WORK EXPERIENCE

Footwear Sales Representative

March 2018 - Present

Dick's Sporting Goods, Naperville, IL

- Collaborated with managers, department leads, and teammates on department-specific projects to ensure seamless execution.
- Engaged with customers to understand their needs, recommending tailored product solutions for optimal satisfaction.
- Leveraged in-depth expertise in footwear products to effectively meet customer needs and drive sales.
- Organized and maintained stockroom to enhance store efficiency and overall operational success.

Intern

September 2019 - March 2020

Indiana Illinois Iowa Foundation for Fair Contracting, Countryside, IL

- Developed and managed an Excel spreadsheet containing detailed contact information (names, addresses, and phone numbers) for 4,000 election sponsor candidates.
- Audited and updated county webpages to ensure they provided the most current and accurate PDFs of local ordinances across three states.

PROJECTS

Real-Time CRM Dashboard:

- Developed a production-ready internal tool using Refine, GraphQL, and Ant Design. Features include secure authentication, real-time analytics, Kanban boards, and responsive design. Provides full CRUD functionality, role-based access control, and customizable dashboards for B2B apps or internal tools.

Loan Default Prediction Using Machine Learning:

- Developed and trained three machine learning models—Logistic Regression, Naïve Bayes, and Multi-Layer Perceptron—to predict loan defaults, achieving accuracies of 82.9%, 80%, and 89.5%, respectively. Optimized model performance through data preprocessing techniques, including outlier detection, handling missing values, and feature scaling.

Coding Kickstart:

- Designed and developed a web-hosted application for testing users on various computer science topics, including a custom text editor for coding questions. Leveraged Google's Firebase suite (Cloud Firestore, Cloud Functions, Authentication, and Hosting) for backend services and utilized ReactJS to create an interactive and user-friendly front-end interface.

HONORS AND AWARDS

- Dean's List, Lewis University, three semesters
- Cum Laude Graduate
